

# TIME SYNC INSTRUCTIONS

For correct date & time stamp settings on your video recordings.

1

**CONNECT** your helmet to your computer with the provided USB cable and press the [Power] Button.

2

**CREATE** a document called "TIMESYNC", in all caps, using your computer's plain text application.

This file must use the ".txt" file extension.

PC

Notepad

MAC

Text Edit

*Standard text editors on most computers*

3

**WRITE** the TIMESYNC file. Use this format *exactly* for your TIMESYNC document:

TIMESYNC  
[Date]  
2013/02/09  
16:07:23 =

- A** [Date] is case sensitive. Do not use ALL CAPS or all lowercase.
- B** Date should be written as Year-Month-Day in this format: 0000/00/00
- C** Enter time in Military format: HR-MIN-SEC in this format: 00:00:00

4

**SAVE** your TIMESYNC.txt document to the helmet drive.

TIMESYNC.txt

VH

5

**DISCONNECT** the helmet from your computer and the record date and time will be up to date.
